# National Register of Historic Places Registration Form

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in National Register Bulletin, *How to Complete the National Register of Historic Places Registration Form*. If any item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions.

### 1. Name of Property

Historic name: Robert Fulton School

Other names/site number: Fulton Hill Elementary School; VDHR No. 127-0378

Name of related multiple property listing:  
Public Schools of Richmond, Virginia, 1869-1930

(Enter "N/A" if property is not part of a multiple property listing)

### 2. Location

Street & number: 1000-1012 Carlisle Avenue

City or town: Richmond State: VA County: Independent City

Not For Publication:  Vicinity:

### 3. State/Federal Agency Certification

As the designated authority under the National Historic Preservation Act, as amended,

I hereby certify that this X nomination     request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets the procedural and professional requirements set forth in 36 CFR Part 60.

In my opinion, the property X meets     does not meet the National Register Criteria. I recommend that this property be considered significant at the following level(s) of significance:

    national     statewide   X   local

Applicable National Register Criteria:

  X   A     B   X   C     D

<p><b>Signature of certifying official/Title:</b> <u>Virginia Department of Historic Resources</u> State or Federal agency/bureau or Tribal Government</p>	<p><b>Date</b></p>
--	--------------------

<p>In my opinion, the property <u>   </u> meets <u>   </u> does not meet the National Register criteria.</p>	
<p><b>Signature of commenting official:</b></p>	<p><b>Date</b></p>

## 7. Description

### Architectural Classification

(Enter categories from instructions.)

LATE 19<sup>TH</sup> AND 20<sup>TH</sup> CENTURY REVIVALS: Colonial Revival

---

---

---

---

---

---

**Materials:** (enter categories from instructions.)

Principal exterior materials of the property: BRICK; CONCRETE; ASPHALT; WOOD

### Narrative Description

(Describe the historic and current physical appearance and condition of the property. Describe contributing and noncontributing resources if applicable. Begin with a **summary paragraph** that briefly describes the general characteristics of the property, such as its location, type, style, method of construction, setting, size, and significant features. Indicate whether the property has historic integrity.)

---

#### Summary Paragraph

Located in the City of Richmond, Virginia, the Robert Fulton School occupies a 1.5-acre parcel at the intersection of Union Street and Carlisle Avenue. The Colonial Revival building was designed by architect William Leigh Carneal, who produced numerous designs for school buildings and campuses across Virginia during the early twentieth century. The Fulton School is a two-story brick building with a poured concrete basement, red brick veneer, hipped roof, and a monumental, two-story, three-bay, gable-roofed portico on the west façade. The portico is supported by huge cast concrete Doric columns and pilasters on brick pedestals with a wide, molded frieze and pediment. The centered entry has double-leaf, half-glass doors with a 10-light transom. The façade's fenestration is regular, and is composed primarily of ribbons of double-hung wood sash windows with 6/6 light configurations. The building's overall integrity of location, setting, design, materials, workmanship, feeling, and association is very good.

---

#### Narrative Description

Built in 1917, the Robert Fulton School is located at the corner of Union Street and Carlisle Avenue. The latter street is still constructed of cobblestones which are reminiscent of this time period. The site, 1.5 acres, is flat consisting of lawn, scattered trees and shrubs, and a large,

Robert Fulton School  
Name of Property

Richmond, VA  
County and State

paved parking area on the rear of the building. The surrounding neighborhood is composed of single-family detached houses in addition to a community park.

The Robert Fulton School is a two-story brick building with a poured concrete basement and is an example of the Colonial Revival style. The school has a T-shaped footprint constructed of poured concrete and slab foundation. The structural system is also poured concrete with a red brick exterior finish laid in Flemish bond. The hipped roof is wood framed and is sheathed with asphalt shingles. The main entrance to the building fronts the cobblestone Carlisle Avenue. The two-story, three-bay, front-gabled portico contains a major portion of the ornamentation of the building. The portico is supported by huge cast concrete Doric columns and pilasters on brick pedestals with a wide, molded frieze and pediment. The centered entry has double-leaf, half-glass doors with a 10-light transom. The façade's fenestration is regular, and is composed primarily of ribbons of double-hung wood sash windows with 6/6 light configurations. A fixed three-light transom is a common feature above all windows on the first and second floors. Widely spaced, round-arched dormers with 6/6 sash punctuate the roof.

On the interior, the T-shaped plan is defined by two double-loaded hallways: a longitudinal hallway on axis with the main entrance, and a transverse hallway with open stairwells at either end. Classrooms are on either side of the hallways. An auditorium/assembly hall is located on the second floor, at the north end of the building. The building has little interior ornamentation. Interior finishes are characterized by plaster walls and ceilings, tile floors, slate stair treads and cast metal balustrades.

During the 1990s, the building was rehabilitated for use as an apartment building. All of the rehabilitation work was reviewed by the Virginia Department of Historic Resources and conformed to the Secretary of the Interior's guidelines for historic rehabilitations. The building now is undergoing another rehabilitation project that again will adhere to the Secretary of the Interior's guidelines. The original floor plan has been retained, with classrooms now serving as residential apartments (see attached floor plan). Interior public spaces such as corridors and stairwells also have been retained, along with the openness of the second-floor auditorium/assembly hall.

## 8. Statement of Significance

### Applicable National Register Criteria

(Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing.)

- A. Property is associated with events that have made a significant contribution to the broad patterns of our history.
- B. Property is associated with the lives of persons significant in our past.
- C. Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- D. Property has yielded, or is likely to yield, information important in prehistory or history.

### Criteria Considerations

(Mark "x" in all the boxes that apply.)

- A. Owned by a religious institution or used for religious purposes
- B. Removed from its original location
- C. A birthplace or grave
- D. A cemetery
- E. A reconstructed building, object, or structure
- F. A commemorative property
- G. Less than 50 years old or achieving significance within the past 50 years

**Statement of Significance Summary Paragraph** (Provide a summary paragraph that includes level of significance, applicable criteria, justification for the period of significance, and any applicable criteria considerations.)

The Robert Fulton School in Richmond, Virginia, is locally significant under Criterion A in the area of Education due to its direct association with an important phase of the City's public school system development during the tenure of city schools superintended Dr. J. A. C. Chandler. The property also is locally significant under Criterion C in the area of Architecture as an example of the work of William Leigh Carneal, an architect of considerable importance in Virginia. The school's period of significance is 1917-1930, beginning with its construction and ending with the period of significance of the *Public Schools of Richmond, Virginia, 1869-1930* Multiple Property Documentation Form (MPD), under which this property is being nominated.

**Narrative Statement of Significance** (Provide at least **one** paragraph for each area of significance.)

The Robert Fulton School was named for the surrounding community and for the American inventor, Robert Fulton. The community is believed to have derived its name from the Fulton family, which at one time was prominent in the area. The school was constructed as a direct result of residential development in the Fulton Hill area of Richmond during the early twentieth century and as part of a major school construction program initiated by Richmond School Superintendent Dr. J.A.C. Chandler. The school's size and placement on top of Fulton Hill make it visible from many vantage points in the city. It replaced an older school (Nicholson) which was located in the flat area of Fulton near the James River. The Robert Fulton School, completed in 1917, educated the students of Fulton Hill for many years and demonstrated the City's commitment to public education.

According to public records, the Robert Fulton School opened January 1917, with seating for 1,083 pupils ranging from kindergarten through eighth grade. For a number of years, the principal of Robert Fulton also had supervision over the Indian School and Webster Davis School. During the mid-twentieth century, the demographics of the Fulton neighborhood changed as white residents fled urban environments for the suburban neighborhoods that proliferated around Richmond. The vast majority of these neighborhoods included covenants that prohibited sale of houses to African Americans and other minority groups. Thus, the Fulton neighborhood became a predominately African American neighborhood and Robert Fulton School's enrollment also shifted from an all-white to a majority of African American students. Richmond's public schools slowly desegregated during the 1960s, with the last white school in the Church Hill area closing in January 1969, after which its students were transferred to Fulton. The Robert Fulton School was closed in June 1979 and declared surplus to the City on August 1, 1980. The building was subsequently purchased for use as an arts center, before being converted to an apartment building during the 1990s, a function it continues today.

Robert Fulton School  
Name of Property

Richmond, VA  
County and State

The Fulton School shares certain design traits common to hundreds of others found throughout Virginia. While historic school buildings varied greatly in terms of their size, style, and materials, their designs did adhere to certain standards. The earliest published standards for school buildings date to 1832 when William A. Alcott prepared a brief treatise on school design. Alcott stressed that fresh air, space, and light were necessary in promoting a healthy learning environment. He suggested the liberal use of large windows, classrooms providing a separate desk for each pupil, and open surroundings for recreation. For more than a century afterwards, school architects followed standards largely inspired by him. These characteristics were shared by schools ranging from one-room rural types to large urban schools such as the Robert Fulton School.

The Robert Fulton School is being nominated under the *Public Schools of Richmond, Virginia, 1869-1930* Multiple Property Documentation Form (MPD), which states that Richmond's public schools constructed between 1869 and 1930 are locally significant and fulfill Criteria A and C for listing in the National Register of Historic Places. Under Criterion A, the properties included are locally significant in the area of Education as they are directly associated with events and patterns of development significant to the development of public education in the City of Richmond between 1869 and 1930. It is important to note that during this period, public education was racially segregated. Although the doctrine of "separate but equal" established by the U.S. Supreme Court in its 1896 *Plessy v. Ferguson* decision was supposed to require separate, equal facilities for white children and those for minority children, in reality Virginia's and Richmond's public school programs devoted far more resources to schools for white children, such as the Robert Fulton School.

Under Criterion C, the city's public schools also may be locally significant in the area of Architecture as good examples of public school architecture. They frequently have further significance for their detailing, embodiment of an important style or material, or their association with a significant architect. In the case of the Robert Fulton School, it is a fine example of Colonial Revival architecture that was produced by William Leigh Carneal.

### **Criterion A – Education**

A statewide system of public education had not existed in Virginia prior to the Civil War. This was due in large part to a reluctance by the Commonwealth's ruling elite to devote resources to such a system and their preference for maintaining a strong tradition of private schools, academies, and colleges, that were reserved in great part for white males from well-to-do families.

Virginia's first state support for public education began in 1851, following a revision of the Virginia Constitution that allowed certain state taxes to be earmarked for local primary schools. As a result, the City of Richmond initiated a modest public school program. In 1851 the Richmond City Council voted to establish free ward schools where needed. By February 1853, there were primary schools in Monroe, Madison, Jefferson, and Marshall wards. Virginia

Robert Fulton School  
Name of Property

Richmond, VA  
County and State

educational conventions at Richmond in 1856 and 1857 probably stimulated expansion of the local school system. By January 1860 Monroe Ward had three schools. Funding was, however, modest. City Council records indicate that teachers were at times purchasing books, supplies, and other needed items from their salaries. Classes were held in rented space or city owned property. It appears from the historical record that no buildings specifically designed as public schools were ever constructed in Richmond prior to the Civil War.

Virginia's 1869 Reconstruction Era state constitution mandated creation of the Commonwealth's first statewide system of free public schools. Federal judge John C. Underwood presided over the constitutional convention, and the resultant document is also known as the Underwood Constitution. Although the 1869 constitutional convention was dominated by "Radical Republicans" dedicated to reforming Virginia's previously slavery-based society, the Underwood Constitution mandated racially segregated public education, with white, African American, and Virginia Indian children attending separate schools.<sup>1</sup> By 1872, according to the *Second Annual Report of the Superintendent of Public Instruction*, 3,695 public schools were recorded in the Commonwealth.<sup>2</sup>

The State Board of Education was established to oversee this new system, and to later historians has been considered symbolic of the growing awareness of the value of public education to society, as espoused by national educational reformers such as Thomas Mann and Henry Barnard. According to the Richmond Public Schools MPD, creation of the public school system also was part of a trend toward institutionalized and professionalized governmental services and regulation both at the state and local level. In addition to its local board of education, the City of Richmond created a Board of Health in 1870, a Board of Police Commissioners in 1877, and a Fire Commission in 1888. These services added to the quality of life in Richmond and served to promote the common good by improving health care and implementing public safety programs.

On June 9, 1869, the Richmond City Council established a local public school system, creating a seven-member board of education. Andrew Washburn of Massachusetts was appointed the first superintendent. Between 1865 and 1869, the Freedmen's Bureau and northern missionary societies provided several schooling programs for Richmond's African American children, including one housed at the Confederate Arsenal. These schools were quickly incorporated into the City school system. In attendance the first year were 1,008 white and 1,769 African American students. Two years later the local system was fully aligned with the state public education system. Funding support was derived from the poll tax, property taxes, and local taxes. The Peabody Fund, founded in 1867 by George Peabody of Massachusetts to provide financial support for primary schools and teacher training in the former Confederate states, matched the initial appropriation of Richmond's city council. Driven by rapid population growth, its importance as one of the major urban industrial centers of the South, and compulsory attendance, the City of Richmond built a large number of schools between 1869 and 1930.

Despite the good intentions of the 1869 constitution, during its first decades Virginia's public school system was poorly regulated and even more poorly funded. In 1902, under Governor Andrew Montague, a new state constitution was passed to replace the Underwood Constitution

Robert Fulton School  
Name of Property

Richmond, VA  
County and State

of 1869. The new constitution did much to disfranchise African Americans and enshrined Jim Crow segregation in Virginia law, but also provided some Progressive Era reforms, such as provisions for workmen's compensation, railroad regulation, and, importantly, increased funding for public schools, improved teacher training, and a goal of making high school available to more students.<sup>3</sup> In 1905, Joseph D. Eggleston Jr. became the Commonwealth's first elected state Superintendent of Public Instruction with a campaign slogan of "Education should be the chief business of the state."<sup>4</sup> Under Eggleston's purview, the Mann High School Act of 1906 was passed, which promised funding to communities for school construction. By the 1906-1907 school year, there were a total of 7,172 public schools reported in the state and 75 high schools. Out of those 75, only 10 were tuition free. But within just a few years, by 1910, across the Commonwealth there were 360 free high schools and by 1916 there were over 400 throughout the state.<sup>5</sup> Due to Jim Crow segregation, the overwhelming majority of high schools served only white students, and the majority of both state and local school construction funds were set aside for building schools that enrolled only white children.<sup>6</sup>

In 1909, Dr. J.A.C. Chandler was named Superintendent of Richmond Public Schools. Dr. Chandler soon initiated an ambitious construction program which was overseen by Charles M. Robinson, who was appointed Public School Architect that same year. School facilities dating from the period 1909-1930 were more numerous, larger, and superior to the earlier schools through their design, materials, and methods of construction. During Chandler's term as superintendent (1909-1919) twelve new schools were constructed in Richmond, nearly equaling the total of the previous forty years. All but two of these were completed by 1915, during the first six years of his term. The first three junior high schools in the city also were completed under the Chandler administration. These were Bainbridge, Belleview, and Binford. Another thirteen schools were brought into the system through annexation, primarily from former areas of Henrico County. Major additions were also made to several existing schools during the period.

By 1930, the monumental school had become the most common public building in the city and a source of civic aspirations and pride. With its prominent siting on a hill overlooking Richmond's East End and its façade dominated by a two-story, three-bay, gable-roofed portico, the Robert Fulton School certainly fits this standard.

### **Criterion C – Architecture**

#### *William Leigh Carneal*

The Robert Fulton School was designed by the firm of Carneal and Johnston, Architects and Engineers, of Richmond. William Leigh Carneal was a native of Richmond and designed numerous buildings in the city. In addition to the Robert Fulton School, he designed the Nathaniel Bacon School, the Springfield (Bowler) School, and the former Virginia State Library building in Richmond's Capitol Square.

Carneal was born in 1881 in Richmond, where he lived for almost all of his life. He graduated from the Virginia Military Institute (VMI) in 1903, whereupon he worked in his father's hardware store for three years. In 1906, he joined an architecture firm, but after about a year he

Robert Fulton School  
Name of Property

Richmond, VA  
County and State

left to form his own. A year later, he entered a partnership with James Markham Ambler Johnston, an alliance that would become the highly successful Carneal & Johnston, Architects and Engineers firm. Between 1928 and 1945, Oscar Pendleton Wright also was a partner. But for a span during World War I, when Carneal served as a U.S. Army captain assigned to the Ordnance Department in Washington D.C., he lived his entire life in Richmond and practiced architecture up until his death in 1958.

Carneal & Johnston quickly became one of Richmond' most influential architectural firms. In addition to the works listed above, the most prominent of the firm's Richmond work included the State Office Building in Capitol Square (1922-1923), the State Highway Commission Building (1937), and several buildings on the University of Richmond campus, including the Cannon Chapel (NRHP 2013). Among the firm's most enduring legacies are the numerous school buildings produced for elementary schools, high schools, and colleges and universities. The campuses of Virginia Tech and Carneal's alma mater, VMI, bear the indelible stamp of Carneal and Johnston, with over twenty of their designs at Virginia Tech and over a dozen at VMI.

Carneal and Johnston notably displayed considerable diversity in their stylistic choices and demonstrated a proclivity for unexpected designs to suit their clients' needs. Thus, their work included the austere "Moderneclassicist" Library of Virginia and Virginia Supreme Court Building, a 1950s Modern-style building for F. W. Woolworth's (which typically used Art Deco design), and a corporate headquarters for the high-tech Ethyl Corporation that, at the client's request, was based on the Colonial Revival Williamsburg Inn.

Carneal served as the first president of the Virginia Society of Architects, elected in 1939, and was also a member of the Richmond Chamber of Commerce at various times. He also had a strong connection with societies committed to assisting orphaned children. In 1923 he designed the main building for the Richmond Male Orphan Society (later the Virginia Home for Boys and Girls). Upon the building's completion, Carneal served on the organization's board from 1924 to 1949.

#### *Richmond's Public School Architecture*

The Richmond Public Schools MPD explains that, while historic school buildings varied greatly in terms of their size, style, and materials, their designs adhered to standards first promulgated in 1832 by William A. Alcott in a brief treatise on school design. Alcott stressed that fresh air, space, and light were necessary in promoting a healthy learning environment. He suggested the liberal use of large windows, classrooms providing a separate desk for each pupil, and open surroundings for recreation. For more than a century afterwards, school architects utilized these standards in their designs.

In Richmond's public school system, most schools built between the 1870s and 1930 featured a basic classroom size of about 25 by 35 feet, expansive windows, high ceilings, and an open setting, usually with adjacent playgrounds and athletic fields. The Robert Fulton School shared these characteristics, which also were seen statewide in schools ranging from one-room rural types to large urban schools. As noted previously, schools built for white children tended to have

Robert Fulton School  
Name of Property

Richmond, VA  
County and State

far more amenities and educational resources than those for African American and Virginia Indian children, whose parents and community members devoted their own labor and funds to add these features to their children's schools as well.

The original setting of schools built in Richmond between the 1870s and 1930 was generally in residential areas, free of noise, traffic, and other disagreeable elements. Many schools were closely associated with Richmond's historic neighborhoods, often taking the name of the area in which they were located. Such is the case with Robert Fulton, which is located in the long-established neighborhood of Fulton Hill.

In terms of design characteristics, Richmond's public schools were generally two-and-one-half to three-and-one-half stories high, frequently with a raised basement, and were generally the largest buildings in their neighborhoods with regard to height, width, mass, and square footage. The prominence and careful design of these schools made them sources of community pride.

Reflective of their functional purpose as a building filled with classrooms, the massing of school buildings tended to be regular, frequently with a centrally placed entrance within a projecting pavilion and a symmetrical footprint in a rectangular, H, U or, as in the case of Fulton, T shape. The basic interior plan featured classrooms of equal size located on either side of a central corridor. In urban areas such as Richmond, many schools featured auditoriums, meeting rooms, and/or gymnasiums that served as community centers, along with a dedicated principal's office, library, or other special purpose rooms. Such amenities further strengthened the link between schools and their neighborhoods; although these amenities often were not included in schools built for African American and Virginia Indian children, their parents and community members lobbied for them, provided their own labor and materials, and often engaged in private fundraising efforts to create similar spaces.

As explained by the Richmond Public Schools MPD, Richmond's public schools dating from the 1870s to 1930 also often are constructed of locally significant materials. Masonry was the material of preference for Richmond's schools due to its durability and fire-proof characteristics, and was readily available due to a highly productive local brick-making industry. Poured and cast concrete came into use during the 1910s, such as at the Robert Fulton School, and became a common material during the 1920s.

While detailing was generally kept secondary to functional considerations, Richmond's schools, particularly those post-dating 1909, exhibited a range of significant design qualities and architectural styles, including Italianate, Gothic Revival, Beaux-Arts, Classical Revival, Colonial Revival, and Second Empire. Decorative features and significant materials were usually concentrated at exterior entrances and interior staircases.

The Robert Fulton School is an example of Colonial Revival design. As stated in the Richmond Public Schools MPD, the term "Colonial Revival" refers to a rebirth of interest in the early English and Dutch houses of the Atlantic Seaboard. The Georgian and Adam styles were the backbone of the Colonial Revival, which also drew upon Post-Medieval English and Dutch

Robert Fulton School  
Name of Property

Richmond, VA  
County and State

Colonial architecture for references. The Colonial Revival style was introduced at the Philadelphia Exposition of 1876. The centennial of the Declaration of Independence sparked renewed interest in the architecture of the colonial period. Many of the buildings designed for the Exposition were based on historically significant colonial designs. Publicity on the exposition occurred simultaneously with efforts made by several national organizations to preserve Old North Church in Boston, Mount Vernon in northern Virginia, and Monticello in central Virginia, making the Colonial Revival movement symbolic also of the Founding Fathers. As noted in the *Classic Commonwealth: Virginia Architecture from the Colonial Era to 1940* style guide, the 1893 World's Columbian Exposition not only featured monumental classical buildings but also replicas of famous colonial buildings like Mount Vernon. Viewed as the quintessentially "American" style, Colonial Revival also was seen as a way to help immigrants, who were arriving in unprecedented numbers during the late nineteenth century, to assimilate to American values

Some identifying characteristics of Colonial Revival architecture include gable, hip, and gambrel roofs; an accentuated door, normally with a pediment or crown and pilasters surrounds; a fanlight or transom over the door; simple entry porches supported by slender columns; symmetrical facade; double-hung window sash, usually with multiple-pane glazing in each sash; and windows that are frequently set in pairs. The Robert Fulton School was designed with many of these features, although its monumental, classically inspired, two-story portico may be more closely related to the desire to make schools visually prominent landmarks within their neighborhoods.

### **Registration Requirements of the Richmond Public Schools MPD**

As specified under the MPD, to be eligible for the National Register under Criterion A in the area of Education, Richmond's public schools built between 1869 and 1930 must have a direct association with the events and developmental trends in Richmond's public education system. The Robert Fulton school, built in 1917, falls within the specified period and from its beginning was a public elementary school. To be eligible under Criterion C in the area of Architecture, the school building is required to be a significant example of a structural type, to embody an important style or material, or to represent the work of a prominent builder or architect. The Robert Fulton School was designed by William Leigh Carneal, of the locally influential Carneal and Johnston architectural firm. The school building retains a high level of integrity, including its original massing, footprint, roof form, brick and concrete construction materials, and monumental portico, as well as detailing including the fenestration pattern, wood 6/6 window sash, primary centered entrance, and round-arched dormers. Rehabilitation projects undertaken during the 1990s were completed in compliance with the Secretary of the Interior's Standards for Rehabilitation, meaning that the building retains the necessary integrity for listing in the National Register.

| 1. Zone: | Easting:  | Northing: |
| 2. Zone: | Easting:  | Northing: |
| 3. Zone: | Easting:  | Northing: |
| 4. Zone: | Easting : | Northing: |

**Verbal Boundary Description** (Describe the boundaries of the property.)

The historic boundary coincides with the legal tax parcel boundary of the Robert Fulton School as identified by the City of Richmond Tax Assessor's Office. The true and correct historic boundary is shown on the attached Location Map and Tax Parcel Map.

**Boundary Justification** (Explain why the boundaries were selected.)

The historic boundary encompasses the entirety of the parcel associated with the Robert Fulton School since its construction in 1917 as well as the property's historic setting and all known historic resources.

---

**11. Form Prepared By**

name/title: Margaret Freund  
organization: Fulton Hill Properties  
street & number: 1000 Carlisle Avenue  
city or town: Richmond state: VA zip code: 23231  
e-mail: mfreund@fultonhillproperties.com  
telephone: 804-226-9555  
date: April 2017

---

**Additional Documentation**

Submit the following items with the completed form:

- **Maps:** A **USGS map** or equivalent (7.5 or 15 minute series) indicating the property's location.

Robert Fulton School  
Name of Property

Richmond, VA  
County and State

- **Sketch map** for historic districts and properties having large acreage or numerous resources. Key all photographs to this map.
- **Additional items:** (Check with the SHPO, TPO, or FPO for any additional items.)

### Photographs

Submit clear and descriptive photographs. The size of each image must be 1600x1200 pixels (minimum), 3000x2000 preferred, at 300 ppi (pixels per inch) or larger. Key all photographs to the sketch map. Each photograph must be numbered and that number must correspond to the photograph number on the photo log. For simplicity, the name of the photographer, photo date, etc. may be listed once on the photograph log and doesn't need to be labeled on every photograph.

### Photo Log

Name of Property: Robert Fulton School

City or Vicinity: Richmond State: Virginia

Photographer: Margaret Freund

Date Photographed: February 2017

Description of Photograph(s) and number, include description of view indicating direction of camera:
