8. Statement of Significance

Applicable National Register Criteria

(Mark x in one or more boxes for the criteria qualifying the property for National Register listing.)

A Property is associated with events that have made a significant contribution to the broad patterns of our history.

B Property is associated with the lives of persons significant in our past.

C Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.

D Property has yielded, or is likely to yield, information important in prehistory or history.

Criteria Considerations

(Mark x in all the boxes that apply.)

A owned by a religious institution or used for religious purposes.

B removed from its original location.

C a birthplace or grave.

D a cemetery.

E a reconstructed building, object, or structure.

F a commemorative property.

G less than 50 years of age or achieved significance within the past 50 years.

SUMMARY DESCRIPTION

Walter Reed Gardens is bounded by South 13th Street to the north, South Edgewood Street to the east, and South Walter Reed Drive to the west. South 13th Road bisects the development in Columbia Heights, Arlington County, Virginia. Constructed in 1948, the complex is sited on approximately five acres and is a planned community that incorporates recreational areas and open spaces. Originally designed with one hundred forty-seven (147) one-bedroom units within eighteen (18) buildings, the condominium conversion reconfigured the buildings to house a total of one hundred thirty-four units (134). The one hundred thirty-four units (134) include fifty-six (56) one-bedroom units and seventy-eight (78) two-bedroom units in four clusters of buildings, 1301-1305 South Walter Reed Drive, 1315-1319 South Walter Reed Drive, 2900-2906 South 13th Street, and 2900-2914 South 13th Road. The remaining area is designed with green areas, a swimming pool, and parking areas. The apartments are shaped around courts with the largest being the "U" court at 2900-2914 South 13th Road.

The four clusters of Walter Reed Gardens are composed of eighteen (18) buildings, all of which contribute to the historic district. The 1982-1984 in-ground swimming pool is non-contributing.

DETAILED DESCRIPTION

Site

Walter Reed Gardens is sited on 5.33 acres of sloping land and is comprised of the Oscar C. Dresser subdivision, north of the A.C. Jones addition to Foxhall. In 1938, the Oscar C. Dresser subdivision included four buildings on the 8.6-acre tract of land.¹ By 1948, the construction of Walter Reed Gardens on the Dresser subdivision and the east extension of South 13th Road through the subdivision reconfigured the lot. A number of parking areas and a swimming pool were added after the 1982-1984-condominium conversion.

Section number 7 Page 2

Exterior

Constructed in 1948, the garden apartments are presented as four building clusters designed in the Colonial Revival style. Within the four building clusters are eighteen buildings. There are four building types with two roof designs found in the development.

The first building design is a three-story building with brick laid in a repeating seven-course American bond. The main entrance is a single-leaf, multi-light door with a four-light transom and wood door surround. The entrance has a one-story entrance porch with a pair of fluted columns, dentiled cornice and an asphalt-shingled, half-hipped roof. The buildings have a brick stringcourse below the third-story windows and a stone stringcourse above the third-story windows. The built-up, flat roof was replaced during the 1982-1984-condominium conversion. The original 6/6 and 8/8 double-hung wood sash windows have been replaced in limited instances with vinyl windows that appear as 6/6 or 8/8 double-hung sash windows. Modest brick sills and louvered shutters are located at the windows. There are five examples of this building type.

The second building design is a two-story building with brick laid in a repeating seven-course American bond. The main entrance is a single-leaf, multi-pane door with a four-light transom. The wood door surround has a pair of engaged pilasters supporting a broken pediment. This building design can be six or seven bays wide with an asphalt shingled, side-gable roof. The original 6/6 and 8/8 double-hung wood sash windows have been replaced in limited instances with vinyl windows that appear as 6/6 or 8/8 double-hung sash windows. Modest brick sills and louvered shutters are located at the windows. There are three examples of this building type.

The third building design is similar to the second building design. It is a two-story building with brick laid in a repeating seven-course American bond. This building is L-shaped and located at the corner of the building clusters. The main entrance is at the corner with a single-leaf, multi-pane door and four-light transom. The entrance has a one-story entrance porch with squared columns and an asphalt-shingled, half-hipped roof. In certain instances, one end of the asphalt-shingled, side-gable roof is finished with interior paired chimneys. The original 6/6 and 8/8 double-hung wood sash windows have been replaced in limited instances with vinyl windows that appear as 6/6 or 8/8 double-

hung sash windows. Modest brick sills and louvered shutters are located at the windows. There are seven examples of this building type.

The fourth building design is a two-story building (three-story brick building where the site slopes dramatically) with brick laid in a repeating seven-course American bond. The main entrance is a single-leaf, multi-light door with a four-light transom and wood door surround. The wood door surround has a pair of engaged pilasters supporting a scrolled broken pediment. The buildings are seven-bays wide and the center three-bays project slightly. The buildings have a molded cornice and an asphalt-shingled, side-gable roof with interior paired chimneys. The center front gable has a circular louvered opening adorned with four keystones. The original 6/6 and 8/8 double-hung wood sash windows have been replaced in limited instances with vinyl windows that appear as 6/6 or 8/8 double-hung sash windows. Modest brick sills and louvered shutters are located at the windows. There are three examples of this building type.

The secondary elevations are utilitarian in design and several units have private yards or wood decks to the rear.

The swimming pool, located at South 13th Road between 1305 South Walter Reed Drive and 2906 South 13th Street was constructed after the 1982-1984-condominium conversion. Modest metal fencing surrounds the in-ground concrete pool. This area was originally designed as a green space.

Interior

Walter Reed Gardens included one hundred forty-seven (147) one-bedroom units.ⁱⁱ A single public entrance at the main elevation provided access to public corridors and stairs leading to the individual units. The original finishes and treatments in the individual units are unknown.

At the time of the 1982-1984-condominium conversion, the floor plans in the individual buildings were re-configured to accommodate two-bedroom units. These alterations created a total of one hundred thirty-four units (134); fifty-six (56) remained one-bedroom units and seventy-eight (78) became two-bedroom units.ⁱⁱⁱ The windows, mechanical,

STATEMENT OF SIGNIFICANCE

Walter Reed Gardens, known today as the Commons of Arlington, is a small-scale garden apartment complex constructed in Arlington County, Virginia, in 1948. The garden apartment design is significant for its role in providing a new type of housing for residents within Arlington County. The design of the garden apartment complex and its relationship to the surrounding landscape represented a distinctly mid-20th-century idea of multi-residential living. The small mass, low height and moderate density of the four building clusters set in a landscaped environment separated them from more urban forms of the property type. Walter Reed Gardens was designed to allow several buildings to be grouped in a pleasing aesthetic plan intended to provide a more hospitable and healthier life for the occupants.

Walter Reed Gardens is eligible for the National Register of Historic Places under criterion C in the area of community planning and development as a fine example of the small-scale garden apartment complexes constructed in Arlington County, Virginia, before and directly after World War II. The Colonial Revival style and open court design of the development is characteristic of the garden apartment complexes funded by FHA-insured mortgages. Walter Reed Gardens is an excellent example of the garden apartment complex as described in the Multiple Property Nomination, *Garden Apartments, Apartment Houses and Apartment Complexes in Arlington County, Virginia: 1934-1954*.

The eighteen buildings of Walter Reed Gardens are contributing to the historic district. The non-historic in-ground swimming pool is non-contributing.

HISTORICAL BACKGROUND

Arlington County during the first half of the 20th Century

During the early 1900s, increased dependability on area streetcars allowed residents of Arlington to work in the District of Columbia and thus, the County began to be marketed as a commuter suburb. Developers and real estate agencies advertised that the County allowed both conveniences to Washington, D.C. and a healthy, bucolic setting for family life. The 1907 publication, *A Brief History of Alexandria County*, touted the advantages of Arlington's proximity to Washington, D.C.:

A person living in Alexandria County [now Arlington County] enjoys, free of cost, all the Government institutions of Washington city, its libraries, its colleges, schools, museums, art galleries, and public buildings and at the same time enjoys the health of country life and escapes all the discomforts of a crowded city.¹

Between World War I and World War II (1917-1945), Arlington County developed a strong identity of its own. Owing to confusion between the City and County of Alexandria, the Virginia General Assembly voted in 1920 to change the name of Alexandria County to Arlington County. The boundaries of the newly named county were challenged when the community of Clarendon attempted to incorporate as a town in 1920. This action was defeated when the courts ruled that Arlington County was "a 'continuous, contiguous, and homogeneous community' that could not be subdivided for the purposes of incorporating a part of it."² Thus, Arlington County began self-government as a single unit without subdivisions.

Beginning in 1920, when the population was just 16,040, Arlington County began to grow at an intense rate as a suburb of Washington, D.C. This compelled the General Assembly of the Commonwealth of Virginia to redistrict the area, giving Arlington County its own delegates in the state's House of Delegates in 1924 and a state senator by 1944. In 1929, the City of

Section number 8 Page 9

Alexandria had annexed another portion of land from southern Arlington County that included the coveted Potomac Yards. Consequently, a special provision was introduced in 1932 preventing further annexation between the City of Alexandria and Arlington County. In 1965, the formal boundaries of Arlington County were established, comprising an area of 25.7 square miles.³

Arlington County's evolution from a commuter suburb to an important employment center in its own right continued through the latter half of the 20th century. By the 1990s, apartment dwellers outnumbered those in single-family houses and almost all of the land in Arlington had been developed, much of it consisting of numerous areas where multi-family dwellings dominate. Although no longer rural, Arlington County remains a continuous, contiguous and homogeneous suburban community, with an economy that reflects a key federal presence and a steadily expanding roster of national association and corporations. Arlington has evolved into a thoroughly urban area and part of the core of the Washington Metropolitan Area.

Walter Reed Gardens and Apartment Development In Arlington, Virginia: 1934-1954

While the population of Washington, D.C. and its suburbs increased dramatically in the years prior to World War I, it increased tremendously after the war. The first increase in population in the Washington, D.C. metropolitan area was attributed to the tripling of the federal work force between 1916 and 1918. The 1920 census reveals that for the first time, the majority of Americans lived in urban and suburban settings, with the suburban population growing at a much quicker rate.⁴ The stock market crash of 1929 suppressed the extensive building rate that had occurred in Washington, D.C. during the early 1920s. By 1934-1935, the construction of new housing units, specifically apartment buildings, was attributed to the influx of new federal workers under Franklin D. Roosevelt's New Deal programs. Arlington County, whose rural landscape would soon be an image from the past, became one of the fastest developing counties in the Washington, D.C. metropolitan area.⁵ The extensive housing shortage in Washington, D.C. led to the construction of approximately one hundred seventy-six (176) new apartment

Section number 8 Page 10

buildings or complexes in Arlington County between 1934 and 1954. These new apartment buildings and complexes included both small and large developments.

The construction of garden apartments in the Washington, D.C. metropolitan area reached a peak in the mid-1930s and early 1940s. In Arlington County, local officials and the federal government wanted to avoid the construction of sub-standard, large-scale developments that would dissolve into slums after the housing emergency eased. Thus, one of the focuses of apartment developments between 1934 and 1954 was the need to construct affordable, attractive and permanent housing. Cost efficiency was continuously emphasized in the construction process, especially for projects backed by the Federal Housing Administration.

Many of the residents who relocated to Arlington during this period were employed under the New Deal programs of the 1930s. The number of Arlington residents continued to grow, with the population reaching 26,615 residents in 1930. This number was more than doubled ten years later with a total of 57,040 residents in 1940. Of those employed in 1940, more than 40% were involved with the government on a local, state, or federal basis. These workers, who made up the largest group of families and individuals in need of rental housing, spurred the government to become involved in housing developments. "Increased rentals for...apartment units... coming in the wake of the largest federal payrolls since the World War [I], were the primary reason for the great revival of...building. Thousands of new employees of the New Deal agencies rapidly took up the slack in residential space, causing rentals to increase 25 percent and more."⁶ The Federal Housing Administration (FHA), established in 1934, became the primary mortgage insurers for thousands of residential projects, both single-family and multiple dwellings, throughout the United States. Between 1934 and 1940, the FHA insured mortgages on 240 rental projects throughout the country and 200 of them were garden apartment projects.⁷ The FHA's involvement in Arlington County directly impacted a number of apartment complexes that would be constructed in the county between 1934-1954. Arlington County's location along the banks of the Potomac River across from Washington, D.C. attracted a number of developers with FHA-insured mortgages to construct these large-scale housing projects. Where the FHA was not directly involved, they influenced the designs and layouts of hundreds of complexes and

Section number 8 Page 11

individual apartments being built in Arlington County. The dramatic increase in population during the 1930s-1940s and the limited availability of affordable rental housing for the middle-class government worker made the County a prime development area.

Federal Housing Administration and Its Influence on Garden Apartment Complex Developments in Arlington County, Virginia

Prior to the establishment of the Federal Housing Administration, the United States government generally avoided any involvement in the mortgage-lending business. The collapse of the stock market in 1929 and the subsequent foreclosures on thousands of properties by mortgage lenders led to the increasing demand for government assistance. The Federal Home Loan Bank Act of 1932 had set up a home loan banking system that "authorized to make advances to member home financing institutions secured by first mortgages."⁸ This act was the first of a number of attempts by the Hoover administration to address the concerns of the homeowner and mortgage lending communities. The election of Franklin Roosevelt and the continuing devastation of the housing situation led the new administration to focus a number of new laws on these issues, particularly the establishment of the National Recovery Act of 1933. This act "authorized the use of Federal funds through the Public Works Administration to finance low-cost and slum clearance housing and subsistence homesteads."⁹ These actions, although not the cure all that the American people hoped it to be, were the building blocks that led to the National Housing Act of 1934 (NHA) and the establishment of the Federal Housing Administration.

It was through the enactment of the National Housing Act that funding was available for many of the apartment projects in Arlington County. The first commitment by the FHA to insure a mortgage under the NHA on a low-cost housing project was Gustave Ring's Colonial Village at Wilson Boulevard and North Taft Street (1935, 1939, 1954-1955), in Arlington County. Colonial Village became a model for FHA-assisted rental apartment complexes throughout the United States. Colonial Village, when the three phases were completed by 1955, provided 974 rental units. The success of Colonial Village spurred the construction of other garden apartment complexes based on its design and ideals. Colonial Village was listed on the National Register

Section number 8 Page 12

of Historic Places in 1980 in recognition of its contribution to the garden apartment movement and the influence of the Federal Housing Administration on the rental housing developments in the 1930s.

Amendments to the National Housing Act were passed in 1938 and again in 1939, spurring increased use of FHA-backed financing for projects in Arlington County and across the United States. Arlington Village in Columbia Heights was the second large rental housing development constructed by Gustave Ring in Arlington County. The site of Arlington Village, like Colonial Village, was an undeveloped, sloping site located along a major thoroughfare. Columbia Pike, which served as the north boundary of Arlington Village, provided residents with easy access to public transportation and shopping. A shopping center serving Arlington Village residents was constructed along Columbia Pike, repeating the retail formula Ring implemented at Colonial Village. "Like its predecessors, this [Arlington Village] latest Ring project will be a complete community in itself."¹⁰

In Arlington County, numerous developers, regardless of their use of FHA-insured mortgages, embraced the influence of the Federal Housing Administration and its building principles on apartment developments. The continued success of FHA-insured projects, such as Colonial and Arlington Villages, proved the financial benefits of employing the methodology supported by the FHA. The continuing need of affordable, rental housing in Arlington County and the embracement of garden apartment complexes by the public was a successful formula to be repeated. The FHA's Large Scale Housing Division regulations and their effect on all housing constructed under the guidance of FHA-insured mortgages molded the garden apartment complexes developed in Arlington County.¹¹ These standards, while not specifically geared toward controlling architectural design, appear to have had a substantial influence on the overall design of Walter Reed Gardens. The garden apartment complex's use of building clusters, open courts, central entrances, and Colonial Revival design elements reveals the influence of the FHA's standards and principles.

The FHA standards addressed seven specific issues: community, neighborhood, site, buildings,

National Park Service**

**NATIONAL REGISTER OF HISTORIC PLACES
Continuation Sheet**

**WALTER REED GARDENS HISTORIC DISTRICT
ARLINGTON COUNTY, VA (000-8824)**

Section number 8 Page 13

dwelling units, services and cost. Regarding the community, FHA required that the area currently support a "number of diverse sources of income for the families to be served and that there exists a need for the type of development contemplated." The FHA also required that the developers give "assurance[s] of continued harmonious land uses; [and] integration of the neighborhood and project." The site was required to be free from adjacent topographic and industrial influences, conform to site characteristics and have a land coverage per acre, "for large-scale projects limited to 20-25%."¹² One of Arlington County's most favorable characteristics was its large tracts of land that had limited or non-existent development. In the Columbia Heights neighborhood of Arlington County, large swaths of land previously used for farming had begun to be subdivided in the 1930s and 1940s. Arlington Village, constructed in 1939, is sited on approximately fifty-three acres and is a planned community that incorporates recreational areas, open spaces, a community building and courtyards within five superblocks. This large development in Columbia Heights spurred smaller garden apartment complexes in the neighborhood including Walter Reed Gardens. Located along the west boundary of Arlington Village, Walter Reed Gardens was sited on the former land of Oscar C. Dresser. Dresser's land, located at South 13th Street, South 16th Street and South Highland Street (South Walter Reed Drive), incorporated 8.6 acres of largely undeveloped land. Aura Tinkle, President of Walter Reed Gardens, Inc., and his wife Frances purchased the land from Dresser in January 1947 and sold it to Walter Reed Gardens, Inc. in September of that same year.

Arlington County was a testing ground for the FHA's new programs and the early successes here spurred the repetition of the design of these garden apartment complexes across Arlington County and the nation. Walter Reed Gardens is an excellent example of the FHA's influence on the small-scale garden apartment development in Arlington County.

Walter Reed Gardens, Post World War II, and Veterans' Housing in Arlington: 1946-1949

The conclusion of World War II brought victory and peace to the United States and her allies, but the housing situation at home remained a priority for the government and local officials across the nation. The FHA and private developers turned their attention from fulfilling the needs of

wartime workers to providing housing for the thousands of returning veterans. Section 608 of Title VI, which was used for Defense Housing during World War II, was re-enacted after the war to provide the veterans' emergency housing program. Immediately following the war's conclusion, the rate of development was strong and continued through 1948. The garden apartment complex at Walter Reed Gardens was originally designed with one-bedroom units in order to entice single veterans and childless couples in Arlington County. This apartment complex was similar in design and style to the individual low-rise apartments and smaller garden complexes being constructed during the later half of the 1940s throughout Arlington County.

Although the need for housing among returning veterans was the primary reason for the consistent demand for more housing in Arlington, the ushering in of the Cold War and the retention of large numbers of workers employed by the federal government exacerbated the problem. Arlington County officials, recognizing that the end of World War II would not relieve the pressure on the county, created a post-war planning committee in 1942. This committee aided in shaping Arlington County's planning for capital improvements and new developments in response to the anticipated jump in population.¹³ South Highland Street, now known as South Walter Reed Drive, was refurbished at the time of Walter Reed Gardens construction. During the same time, South 13th Road was extended west to meet South Walter Reed Drive, bisecting the Walter Reed Gardens complex.

10. Geographical Data

Boundary Justification

The boundaries for the property include the original acreage purchased by Walter Reed Gardens, Inc. for the development of Walter Reed Gardens. The property currently contains approximately 5.3 acres. The original land acreage purchased by Oscar Dresser was 8.83 acres, but 5.6 acres was transferred between Oscar Dresser and Mr. And Mrs. Tinkle. Walter Reed Gardens was developed on 5.3 acres of land. The east boundary abuts single-family housing, the north boundary is 13th Street South, the west boundary is South Walter Reed Drive and 13th Road South bisects the development.
